ANSWER 11:
Do not provide VAS+D services
Child is too young to receive VAS+D.

ANSWER 12:
Do not provide VAS+D services
Vitamin Angels does not provide VAS+D for children 5 years old and older. Parent should check other sources for deworming.

ANSWER 13:
Do not provide VAS+D services
Do not provide services to children with severe difficulty breathing. Send the child immediately to the nearest health facility.

ANSWER 14:
Do not provide VAS+D services
Wait at least 30 days before getting VAS+D again. Recommended dosing is every 4-6 months.

ANSWER 15:
Do not provide VAS+D services
Do not give VAS+D while the child is crying. Wait until the child is calm.
